

EXCITATION RHEOSTAT

EM-30-08-03 (500W, 500Ω)

EDU-LABS

Single resistor rheostat to be connected in series with the excitation winding of AC Synchronous or DC Machines to adjust their field winding.

Applicable as single phase resistive load, to control AC and DC current, etc.

It is sized to start the motor of its range at 50% of its nominal torque for 30 second.

- Modular design
- Resistance: 0 ~ 500Ω Adjustable
- Current: 2A
- Rated Power: 500W
- Protection: Fuse
- Terminals : 4 mm safety sockets

Note: Due to products continuous development process, layout and specification may change without prior notices.
